

DURAN® Tough / CONTURAX® Tough

With transparency and elegance, CONTURAX® and DURAN® Tough glass tubing offers sophisticated exterior and interior design options. CONTURAX® and DURAN® glass tubes from our „Tough“ product line combine exceptional visual clarity with an exclusive polymer coating. Available in smooth and fluted glass tubing, this family of products achieves a high safety standard and invites a wide range of new design possibilities for residential, commercial and retail spaces. The coating is applied to the inner surface. This ensures that the CONTURAX® Tough and DURAN® Tough glass tubing maintains its form and integrity in the event of breakage. In addition it provides effective protection against splinters or shards. The UV absorption of the glass protects the coating and further reduces UV degradation of the already stabilized polymer.

Advantages at a glance

- High transparency and visual quality for architectural and industrial design
- Precise geometric tolerances enable accurate fitment
- Clear inner polymer coating does not detract from the transparency and elegance of the glass tubes, yet assists in creating a safer product
- In case of breakage, CONTURAX® Tough and DURAN® Tough glass tubing helps retain product integrity, considerably reducing the risk of injury
- Available in lengths from 1,500 to 4,000 mm (59 to 156 inches)

DURAN® Tough

CONTURAX® Tough

Outside Diameter (OD)	Wall Thickness (WT)	Length
120 mm	5 mm	1,500 – 4,000 mm

Outside Diameter (OD)	Wall Thickness (WT)	Length
100 mm	3 mm	1,500 – 4,000 mm
120 mm	5 mm	1,500 – 4,000 mm
