

## **TopLine cartridges** beyond the industry standard

To secure patient safety, the requirements for pharmaceutical glass cartridges are high, especially for parenteral applications: • Dimensional inaccuracies can lead to difficulties during filling or even put container closure integrity at risk

- Cosmetic properties are highly relevant for inspectability and imperfections may result in high reject rates during fill-and-finish
- · Chemical resistance is crucial to keep drug-container interaction at a minimum

SCHOTT TopLine cartridges offer tighter cosmetic and dimensional AQLs\* than StandardLine cartridges. Further customization is possible upon request.

of AQLs

accurate dimensions

Low reject rate and excellent inspectability due to high cosmetic quality

\* AQL = Acceptable Quality Level. Indicates how high the maximum proportion of a defective subset can be that is considered acceptable quality in a sample. \*\* limitations may come from secondary packaging.

SCHOTT PHARMA

#### **Release tests**

#### Dimensions

Defined parameters in drawing determine testing

#### In-line inspection

- 100% by camera/sensor
- Defined standard parameters: neck outer diameter, collar outer diameter, collar height, neck and collar height, total height, bottom depth, inner neck diameter
- Plus additional optional parameters (e.g. collar radius, shoulder angle)

#### Statistical off-line inspection

- Minimum inspection level S-4 (according to ISO 2859-1)
- Standardized global test methods based on off-line camera, profile projector, caliper, etc.
- Defined standard parameters (e.g. outer diameter, bottom thickness, outer heel radius)
- Additional optional parameters

Lengths I1 and I2 shall be agreed upon between manufacturer and custome

SCHOTT Pharma offers a global manufacturing network paired with outstanding hot forming experience and a continuous drive for innovation

**(☆**)

Ø

Advancing the industry with groundbreaking glass innovations such as borosilicate glass for over 130 years

Fueling science and inspiring progress in hot forming with dedicated competence centers

Providing customers with state-of-the-art quality and inspection technologies

Offering supply security for the entire value chain due to vertical integration with the leading borosilicate tubing manufacturer
