

SCHOTT Termofrost® CRS: Insulated doors for chiller and freezer cold rooms.

The complete range for your cold rooms requirements

SCHOTT Termofrost® CRS Classic: glass door systems for cold rooms

Product description

This timeless and functional glass door system displays chilled and frozen goods stored in cold rooms. Our large selection of door systems provides the flexibility for realising various reach-in or walk-in solutions in many configurations and sizes.

Meat, dairy products, ice cream, frozen vegetables or flowers are perfectly visible through the door while the required temperature for the stored goods is maintained. Good insulation properties of the doors support energy efficiency of cold rooms in petrol stations, cash & carry markets and other food retail stores.

A flexible shelving system complements this display door range: chilled and frozen food can be presented in a well arranged, attractive manner.

Take advantage of the benefits

- Large variety of door variants
- Perfectly insulated door for chiller and freezer presentation
- Condensation free view
- Robust frame and door construction
- Hold open function for easy refilling of the shelves

Universal installation possibilities
