

Document of Conformity

The accounting methodology

“SCHOTT PCF Tools”

V 1.1, as of 21/05/2026

for determining product carbon footprints, developed by the organisation

SCHOTT Pharma AG & Co. KGaA

at the site

Hattenbergstr. 10, 55122 Mainz

has been validated in accordance with the requirements of the standard:

GHG Protocol – Product Life Cycle Accounting & Reporting Standard

September 2011 edition

The validation was carried out in accordance with the requirements of ISO 14064-3:2020-05.

The accounting methodology meets all requirements placed on the accounting system and the determination of greenhouse gas-relevant information for the calculation of a Product Carbon Footprint in accordance with the accounting approach set out in the above-mentioned standard. The accounting methodology covers the following life cycle stages:

Raw material extraction, pre-production, upstream transport, production

The emission factors used for the calculation are based on published information or recognised, credible sources. The applied accounting methodology was checked for suitability and plausibility.

The determination of the specific Product Carbon Footprints and the correct application of the underlying methodology are the responsibility of the organisation named above.

Basis of the document is the test report with the number C-26-24396.

Berlin, 01/06/2026

Prof. Dr.-Ing. Jan Uwe Lieback
Managing Director

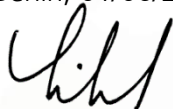

No. C-26-24396-Tool-PCF-GHGP

Annex to the document of Conformity C-26-24396-Tool-PCF-GHGP
