Glass tubing and rods for architecture, art and design Pioneering – responsibly – together. These attributes characterize SCHOTT as a manufacturer of high-tech materials based on specialty glass. Always opening up new markets and applications with a pioneering spirit and passion – this is what has driven the #glasslovers at SCHOTT for more than 130 years. Represented in 34 countries, the company is a highly skilled partner for high-tech industries: Healthcare, Home Appliances & Living, Consumer Electronics, Semiconductors & Datacom, Optics, Industry & Energy, Automotive, Astronomy & Aerospace. As a foundation company, SCHOTT has anchored responsibility for employees, society and the environment deeply in its DNA. The goal is to become a climate-neutral company by 2030.

With a production capacity of more than 190,000 tons and production sites in Europe, South America and Asia, SCHOTT Tubing is one of the world's leading manufacturers of glass tubes, rods and profiles. More than 60 different glass types are produced in a large variety of dimensional and cosmetic specifications based on a standardized production process and a global quality assurance system. SCHOTT Tubing provides customized products and services for international growth markets such as pharmaceuticals and electronics as well as industrial and environmental engineering.

- 13 Glass Constructions
- 14 Product Presentation

DURAN® Tough & **CONTURAX®** Tough

- High transparency and visual quality for architectural and industrial design
- Precise geometric tolerances enable accurate fitment
- Clear inner polymer coating does not detract from the transparency and elegance of the glass tubes and eliminates shattering in big sharp pieces

Available in lengths from 1,500 to 4,000 mm

- More dimensions on request (condition: successful technical examination on feasibility)
- Fine-crumbly fracture pattern similar to single-pane safety glass

Our Products

DURAN[®]

4

- Chemically high resistant borosilicate glass with high temperature change resistance
- Glass tubes with outer diameters from 3 to 465 mm
- Lengths between 600 and 10,000 mm (dependent on outer diameter and wall thickness)

GERMAN INNO VATION AWARD'22 WINNER

CONTURAX® & **CONTURAX®** Pro

- Glass tubes and rods available in multiple shapes
- Lengths between 1,200 and 4,000 mm possible (dependent on profile and dimensions)
- Technical examination/development of new profiles costs on request

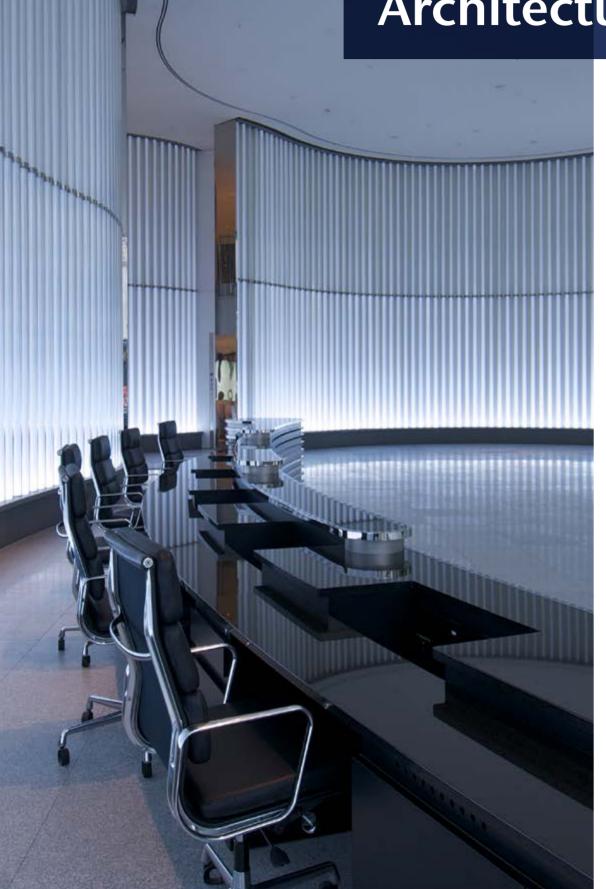

DURATAN®

Thermally prestressed DURAN[®] glass

- Glass tubes with outer diameters from 100 to 400 mm available (dependent on wall thickness and length)
- Lengths from 100 to 1,700 mm (dependent on outer diameter and wall thickness)
- Wall thickness at least 5 mm required
- Smooth and transparent glass

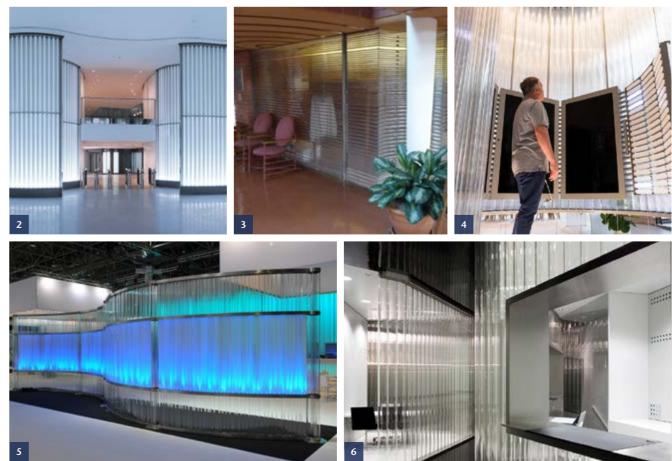

Architecture

- 6 Arquia Bank, glass walls, Bilbao, Spain DURAN®

Facades

Glass tubing does not only fascinate architects for interior design but can also convince as facades. Glass tubing has the ability to protect the inside from direct sunlight and still look elegant. But the possibilities are endless: Glass rods glued on flat glass gives the facades of luxury stores the final touch.

For elegance, style and a feeling of timeless luxury, there's nothing that comes close to glass. It defines the look of the world's top hotels, restaurants, and spas, while museums, stores, and workplaces all benefit from its seamless blend of style and function. Whether it's used for a stunning statement piece or a gentle source of light, designers always turn to glass to add instant appeal and exquisite detail.

That purpose could be beauty, inspiration, social change, or practical. However, whatever the desired outcome, glass has the ideal combination of material properties and elegant looks to elevate any installation or construction from ordinary to extraordinary. Whether glass is the central feature or complements other materials, it boosts creativity by enabling new ways to create unique and memorable structures, making art more accessible and part of everyday life.

Art Installations

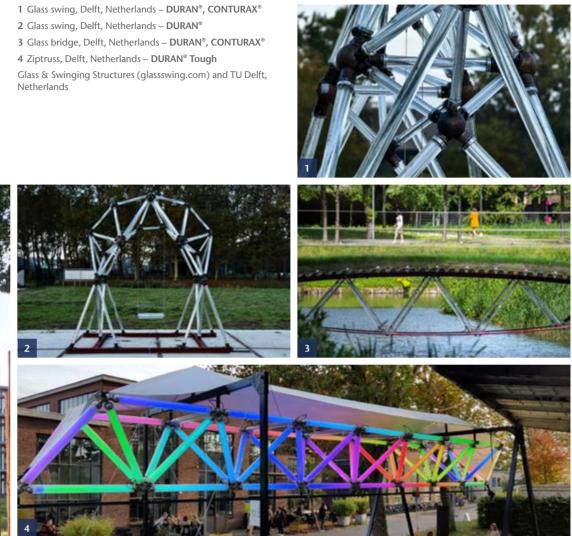

Great art always serves a purpose

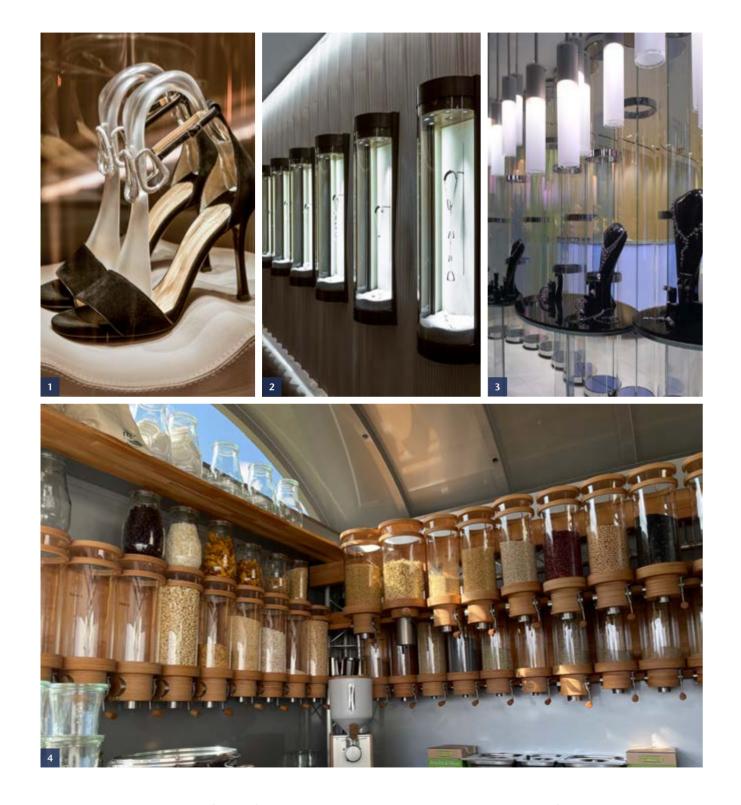

Glass **Constructions**

Artists all over the world appreciate the beauty and versatility of glass, and frequently turn to glass tubing and rods when creating memorable and unique installations and constructions.

We offer

Service and support

Our customers get complete consulting from inquiry to delivery

Safe packaging

Our high-quality packaging guarantees a safe transportation of products and is also environmentally friendly

Excellent contacts for further processing

Our network offers company contacts all around coloring, laser printing, sandblasting, drilling and sawing

Wide spectrum in dimensions

We offer nearly infinite possibilities to fulfill your requirements

Flexibility

We offer a high degree of flexibility to meet your desires

Continuing technical development

Thanks to our know-how our customers always get products which were manufactured on the highest technical level
