

Door glass fascade extends vertically, providing a crisp flush mount with the upper edge of the cabinet, giving a seamless modern aesthetic look.

Dress up your chiller cabinet all in glass

SCHOTT Termofrost® Skyline Cool

Product description

SCHOTT Termofrost® Skyline Cool combines stylish design and perfect functionality to present chilled food in modern multideck cabinets. Extended doors close flush with the upper edge of the cabinet. This design solution converts the front of a chiller cabinet into an attractive product display with an all-glass look. Due to the increased transparent glass area, the view to chilled food is significantly improved. Overall, your display cabinet benefits from a modern feel with state-of-the-art design.

Take advantage of the benefits

- Esthetic and clean glass front
- Elegant overall impression for a chiller cabinet
- Maximised transparency and product visibility

Extended doors for chiller cabinets
