#### 3.1. Substances

## Material Data Sheet

according to Regulation (EC) No 1907/2006 & UK REACH

### Chemical characterization

specialty glass, chemical, oxide  
 CAS No.: 65997-17-3  
 EC No.: 701-387-5

As the substance glass is not included in the candidate list of substances of very high concern, currently there are no information duties according to article 33 of REACH. However for the production of glass we may use substances, which are on the candidate list and had been included in Annex XIV of the REACH regulation or could be included in future. These powdery substances are not present as such in the final glass; they are fully integrated into the glass matrix through the melting process. Thus they lose their original characteristics. With unintended use, some of these substances may be released from the matrix and become bioavailable.

The main components of the glass batch are listed as additional information in chapter 16.

### Hazardous components

none (according to Regulation (EC) No 1907/2006 & UK REACH Regulation)
