

Transparent front stops allow quick and easy orientation.

# Optimize product **visibility** with efficiently organized shelves

## SCHOTT Termofrost® Flexi Shelf: flexible shelving for cold rooms

### Product description

SCHOTT Termofrost® Flexi Shelf creates an attractive, logical display for food and beverages of cold rooms. This modular system ensures flexible shelf configuration for static or mobile shelving. A wide variety of product options allows countless shelf layouts in accordance with your individual planogram. Various widths and the flexible height positioning fit perfectly to the common dimensions of glass doors for cold rooms and in case you want to change the shelf layout, it can easily be modified. Furthermore, the floor-to-ceiling system simplifies cleaning of the floor, as only two posts are required per segment.

SCHOTT Termofrost® Flexi Shelf improves product visibility with plate and wire shelves that let products automatically slide to the front. Transparent front stops provide a clear view of beverages and food packages. Shelves always appear efficiently organized and in addition stock management is easier because the shelves support self-facing and the staff immediately notice when refilling is necessary. Shelves look always attractive and well stocked.

For simplifying shelf management, the system offers different accessories like dividers, front stops, price holder strips and others. Refilling is possible from rear or from the front. The robust design meets the tough challenges of a commercial environment. The system is available in black and in light grey.

Wire shelf. Brackets allow mounting in different angels.

Plate shelf allow spillage to be contained.
